

Watercolor Tips

1. Save the white (masking fluid where needed)
2. Work back to front
3. Colors dry lighter
4. “Mix it dark”/ No “straight from the tube” colors, Mix with complements instead
5. Keep transparency
6. Always put water down first, except for details
7. Do Not Overbrush
8. Use the biggest brush you can. Never use a small brush for a large area.
9. Let watercolor do its thing—it’s meant to look blotchy
